### EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Weili Cheng on 7/19/06.

The application has been amended as follows:

Cancel claims 20-21.

Claim 23 has been amended to:

The method according to claim 22, wherein the individual triblock polymer component ~~can be~~ is selected based on at least one member of the group consisting of average molecular weights of A-polymer block, average molecular weights of B-polymer block, weight ratios of A-polymer block over B-polymer block, and types of triblock copolymer.

### REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The instant claims are free from prior art. The closest prior art US 5,702,717 does not disclose or suggest 1) a mixture of triblock copolymers or 2) the instant concentration of the hydrophobic polymer and hydrophilic polymer. US '717 teaches the hydrophilic polymer is contained in an amount of 50-85% and the hydrophilic polymer must be in an amount of at least 50% and preferably higher to remain water-soluble. Further, US '717 teaches the hydrophobic polymer is in an amount of 15-50%. Thus, the instantly claimed range wherein the hydrophobic block polymer is 51- 83% and

Art Unit: 1616

the hydrophilic block polymer is 17-49% would *not* be obvious over US '717 since US '717 teaches that in order for the system to be water-soluble and degradable, the hydrophilic polymer should be in a minimum of 50%, preferably more, and the hydrophobic should be at a maximum of 50%.

US 6,004,573 is made of record which teaches the instant triblock polymer and concentration; however US '573 does not disclose a mixture of different triblock copolymers. Additionally, US '573 is unavailable as prior art under 103 (c) since applicant has made the appropriate statement in parent application 09/559799.

Thus, the only remaining rejections in the Final Office Action were obviousness double patenting rejections. However, the Terminal Disclaimers filed 6/30/06 obviate the obviousness double patenting rejections. MPEP 822.01 is cited for the *provisional* obviousness double patenting rejections over 10/186462; 10/167768; and 10/734740.

Lastly, it is noted that a restriction was made in parent application 7,0186,645 on 1/7/02 between I) the biodegradable polymeric system; II) the drug delivery system; III) the method of administering; IV) the process of preparation; and V) the method of adjusting gelation wherein invention I was elected. Claims 20-21 directed to the biodegradable polymer have been cancelled to overcome any double patenting issues.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
